

SURYA PRAKASH KG

Senior UI/UX Designer

+91 948-942-3900 | suryasachin477@gmail.com | behance.net/suryasachin

PROFESSIONAL SUMMARY

UI/UX Designer with **3.5+ years** of experience designing scalable web and mobile products across FinTech, Blockchain, Gaming, and E-commerce domains. Strong expertise in Figma-based design systems, user flows, and responsive UI, collaborating closely with developers and stakeholders. Proven ability to improve usability, engagement, and visual consistency across complex digital platforms.

EDUCATION

Anna University | K.L.N. College of Information Technology | 2015-2019

B.Tech Information Technology (71 %)

CORE SKILLS

UI/UX Design :

User Research, Wireframing, Low-Fidelity Wireframes, User Flows, Information Architecture, High-Fidelity Designs, Prototyping, Design Systems, Responsive Design (Web & Mobile), Accessibility, Usability Testing, A/B Testing, Design Thinking, Problem Solving, User Personas, UI Components, Typography, Color Theory, Iconography, Pixel-Perfect Design, Spacing & Layout, Heuristic Evaluation, User Journeys

Tools :

Figma, Adobe XD, Photoshop, Illustrator, FigJam, Sketch, Miro, Zeplin, Framer

Front-End Awareness :

HTML, CSS, JavaScript (Basic), ReactJS, Bootstrap

Collaboration :

Agile, Cross-Functional Teams, Design Handoff, Design QA

WORK EXPERIENCE

Freelancer | Jul 2024 – Present

UI/UX Designer & Front-End Developer

Designed and developed end-to-end UI/UX and front-end interfaces for web, tablet, and mobile platforms using Figma and ReactJS, ensuring responsive and consistent user experiences across devices.

Guided UI/UX design, user flow creation, and front-end implementation for the following products:

School Management System (EdTech): Student management, attendance tracking, fee management, dashboards, and role-based access for Admin, Teachers, and Students.

Hospital Management System (Healthcare): Appointment booking, doctor schedules, patient records, billing workflows, and real-time dashboards

Inventory Management System: Stock tracking, purchase orders, vendor management, and real-time inventory analytics

Converted high-fidelity Figma designs into responsive ReactJS interfaces, improving usability, performance, and cross-device compatibility by 30%.

Created scalable dashboard layouts with analytics, scheduling modules, and data visualization, enabling faster decision-making and reducing user task completion time by 20%.

Delivered branding, UI systems, and accessibility-focused designs for **Elevar Technologies** and **Jayam Charitable Trust**, ensuring WCAG-aligned color contrast and mobile-first usability.

Designed scalable dashboard layouts with analytics, scheduling modules, and data visualization, enabling faster decision-making and reducing user task completion time by 20%.

Collaborated closely with developers and stakeholders to perform design QA, UI validation, and front-end optimization, reducing UI defects and rework by 25%.

Trained **2 batches** of Master Design students at **FITA Academy**, covering UI/UX fundamentals, design systems, responsive design principles, and real-world project workflows.

Swipewire Technologies | Apr 2024 – Jul 2024

UX Designer

Created responsive UI for a gaming platform, supporting multi-device experiences and improving user engagement by 20%.

Produced icons, banners, and visual assets aligned with brand guidelines using Photoshop.

Conducted design QA with developers, reducing UI defects post-release by 40%.

Maticz Technologies | Jul 2021 – Mar 2023

Senior UI/UX Designer

Directed end-to-end UI/UX design and front-end collaboration for blockchain and FinTech products serving 10K+ active users, improving task completion efficiency by 25% across core workflows.

Designed and implemented responsive user interfaces for web, tablet, and mobile platforms, translating high-fidelity Figma designs into ReactJS-ready UI components to ensure seamless cross-device experiences.

Built and maintained scalable design systems and component libraries, aligning closely with ReactJS architecture, reducing UI inconsistencies and accelerating developer handoff by 30%.

Created interactive prototypes, user flows, and micro-interactions for platforms including Appticz, Nounq, and Impact Redemption (NFT platform), enabling faster stakeholder validation and smoother development cycles.

Partnered with front-end developers and product managers to conduct design QA, usability reviews, and responsive testing, ensuring pixel-perfect implementation and consistent behavior across screen sizes.

Optimized UI layouts and interaction patterns to improve performance, accessibility, and usability, contributing to higher user engagement and reduced support queries.

Xsosys Technologies | Oct 2020 – May 2021

UI/UX Designer

Designed app interfaces and branding assets for Clinur App, ensuring visual consistency across platforms.

Created reusable icon sets and UI components, reducing repetitive design effort by 25%.

Ultiweb Technologies | Oct 2019 – May 2020

Junior Designer

Developed page layouts, icons, and marketing creatives for CRM and travel platforms.

Supported senior designers in UI production and asset delivery for web applications.
